EDUCATION

Jagannath University, Delhi	2023 — Present
Bachelor of Computer Applications in Data Science	CGPA: 6.9/10
* Courses: Data Analysis (Python), ML & Modelling, DSA, DBMS/NoSQL, Data Visualization, Software Engineering, OS, Computer Networks, Digital Image Processing	
D.A.V Public School	2021
Senior Secondary (Class XII)	Percentage: 71%

WORK EXPERIENCE

ML & Data Science Developer Independent Project Work	2023 — Present
Built end-to-end ML pipelines for stock prediction, NLP, and survival classification using Python, Scikit-learn, XGBoost, LightGBM, and Keras/TensorFlow; top result: 73.8% cross-validated accuracy on Titanic across 6 algorithms. Benchmarked 8 algorithms (Logistic Regression, Naive Bayes, SVM, Decision Tree, Random Forest, Extra Trees, XGBoost, LightGBM) with 5-fold CV; documented full classification reports and confusion matrices per experiment. Deployed interactive Streamlit dashboard processing 219,800 stock rows across 106 Nifty 500 tickers with live Yahoo Finance data, Plotly charts, admin panel, and watchlists, managed via Git.	
Data Analytics Virtual Intern Deloitte — Forage	2024
Completed Deloitte's Data Analytics program on EDA, KPI reporting, and business insight generation; applied structured data-cleaning to business case datasets producing consultant-style insight summaries. Certificate verified.	

CERTIFICATION & ACADEMIC PROFILE

Deloitte Data Analytics Virtual Internship (Forage, 2024) | Certificate Link

Kaggle: Titanic (73.8% CV accuracy), IMDB 50k-review NLP pipeline, Nifty 500 stock dataset (219,800 rows) — all version-controlled with documentation.

GitHub Portfolio: All projects hosted with README, metrics & visuals at bansal-yash08.github.io/yashbansal_portfolio

TECHNICAL PROJECTS

AI Stock Market Prediction System — Python, Streamlit, Scikit-Learn, Plotly, yFinance	Demo Source Code
Engineered 7 features (daily return, volatility, EMA, lag, next-close, direction) from 219,800 rows / 106 stocks; trained Random Forest regression & classification reporting MAE, R^2 , and direction accuracy. Deployed full Streamlit dashboard: login, watchlist, admin panel, candlestick & moving-average charts, volume/volatility views; version-controlled with Git and deployment-ready documentation.	
NLP Sentiment Analysis System — Python, NLTK, TF-IDF, Textblob, Naive Bayes, SVM, LSTM	Source Code
Processed 50,000 IMDB reviews with regex cleaning, TF-IDF, Logistic Regression, and Naive Bayes; added live YouTube comment analyser with TextBlob polarity + TF-IDF SVM classification. Built deep-learning pipeline: Tokenizer → Padding → Embedding → LSTM → Dense softmax with full confusion-matrix evaluation.	
Titanic Survival Prediction — Python, Pandas, Seaborn, Scikit-learn, XGBoost, LightGBM	Source Code
EDA on 9 features; imputed nulls, log-transformed Fare, label-encoded categoricals; compared 6 algorithms with 5-fold CV achieving 73.8% accuracy; generated Kaggle-format submission with full metrics.	
Blinkit & Swiggy Sales Analytics — Python, Pandas, Excel, EDA	Source Code
Analysed 8,523 Blinkit retail records & 197,430 Swiggy orders; built KPI dashboards covering revenue trends, avg rating, monthly performance, top cities/states, and veg vs non-veg split with standardised labels.	

SKILLS AND INTERESTS

Languages	Python, SQL, R (basics), Git, GitHub, Google Colab, Kaggle
Machine Learning	Random Forest, XGBoost, LightGBM, SVM, Logistic Regression, Decision Tree, Extra Trees NLTK, TF-IDF, TextBlob, LSTM, Keras, TensorFlow, Tokenizer, Embedding Layers
NLP & Deep Learning	
Analytics & BI	Excel, Power BI (basics), Pandas, NumPy, EDA, KPI Reporting, Business Analysis
Visualization	Streamlit, Plotly, Matplotlib, Seaborn, Confusion Matrix, Classification Report
Domains	Retail, Food Delivery, Stock Market, Survival Analysis, Sentiment Analysis
